

Implementing DevOps in the Real World

WHO CARES ABOUT DEVOPS?

Richard Seroter

SENIOR DIRECTOR OF PRODUCT, PIVOTAL

@rseroter

Overview

Why DevOps matters

The challenge of transforming without it

Benefits of a DevOps culture

Core DevOps values and characteristics

Changes that come with DevOps

DevOps objections

Challenges with enterprise-scale DevOps

“Week in the life” viewpoint

Learning resources

Summary

“Every industry and company that is not bringing software to the core of their business will be disrupted.”

- Jeffrey Immelt, CEO of GE

Some Trends in Software Development

Decline in use of
commercial software

Focus on getting
software into
production

Move away from plan-
build-run as separate
concerns

Challenge with Becoming Software-driven

Lack of trust

Oppressive tech debt

Lack of automation

Competing silo
priorities

Focus on efficiencies
and local optimization

Culture doesn't
accept risk, change

High performing IT organizations:

- 200x more frequent deployments
- 24x faster recovery from failure
- 3x lower change failure rate
- 22% less time on unplanned work
- 50% less time remediating security issues

Puppet Labs 2016 State of DevOps Report

Core DevOps Values

Trust

Empowerment

Accountability

Continuous
improvement

Data-driven
decisions

Customer
empathy

Characteristics of a DevOps Environment

Optimized for throughput

Clear view of entire deployment pipeline

Customer-centric definition of “done”

Small, frequent software releases

Defined feedback loops

Automation-centric

Focused on outcomes, not activities

Changes You **May** See While Adopting DevOps

**Philosophy
changes**

**Team
changes**

**Tool
changes**

**Satisfaction
changes**

Some Core Objections to DevOps

“We’re already doing DevOps. We have a QA and release team.”

“This philosophy doesn’t scale to companies of our size.”

Some Core Objections to DevOps

“Our executives don’t think IT has value and is decreasing their IT investment.”

“We don’t have the tech skills that startups do.”

Some Core Objections to DevOps

“Our compliance needs are too complicated for this.”

Some Core Objections to DevOps

“My company buys commercial software. We don’t build anything.”

“It’s just another fad that we can wait out.”

Enterprise DevOps Differs from “Small” DevOps

More stakeholders

Functional silos in place

Existing technical debt to manage

Specific compliance requirements

Outsourcing arrangements in place

Experience a week of DevOps

Explaining core practices

Recognizing change management needed

Observing “getting started” tips

What is it?

Org/team standup

Who is involved?

Team members, interested parties

Why does it belong in DevOps?

Transparency, throughput, delivery focus
