

Week of DevOps – Wednesdays

Richard Seroter

SENIOR DIRECTOR OF PRODUCT, PIVOTAL

@rseroter

Overview

Onboarding new team members

Establishing monthly operations review

Conduct retros after incidents

Collaborate across teams

Summary

What is it?

Org/team standup

Who is involved?

Team members, interested parties

Why does it belong in DevOps?

Transparency, throughput, delivery focus

What is it?

Onboard new engineer

Who is involved?

Application team

Why does it belong in DevOps?

Cross-training, customer focus

It's About Speed to Productivity

Learn from source
control, deployment,
pipeline, wiki

Good opportunity
to test deployment
pipeline

Pairing accelerates
readiness

Tips for Getting Started

New team members pair with existing ones

Encourage use of application itself

Add to on-call rotation quickly

Iterate onboarding docs based on feedback

What is it?

Attend monthly operations review

Who is involved?

Application team leaders, executives

Why does it belong in DevOps?

Customer focus, continuous improvement

Accountability Breeds Focus

Remain focused
on customer
metrics

Leverage
collective
knowledge

Improves
situational awareness
for executives

Not a problem
solving session

Tips for Getting Started

Ensure each app team defines success

Schedule a monthly review

Lead by example and mention challenges

Actively follow up on problem areas

What is it?

Conduct incident retrospective/postmortem

Who is involved?

On-call engineer, stakeholders

Why does it belong in DevOps?

Continuous improvement, transparency

Culture is Revealed During Retrospectives

Not about
assigning blame

Assemble timeline

Use facts to review
what happened

Explain what worked,
what didn't

Develop action plan
and assign owners

Put record into
discoverable place

Tips for Getting Started

Set up a retro the day after next incident

Choose an interface for collecting feedback

Define crisp action items

Assign someone to keep and share minutes

What is it?

Collaborate across teams

Who is involved?

Application team leads, engineers

Why does it belong in DevOps?

Remove bottlenecks, improve flow

Collaboration In, and Across, Teams

No team should be
entirely independent

Think locally, act
globally

Create system for
quick collaboration
and decision-making

Tips for Getting Started

Invest in a chat room technology

Set up loose boundaries and guidance for commonalities

Foster cross-team communication through hackathons
