

Discovering the Benefits of Automation

Josh Duffney

DEVOPS ENGINEER

@joshduffney <http://duffney.io/>

Storyline

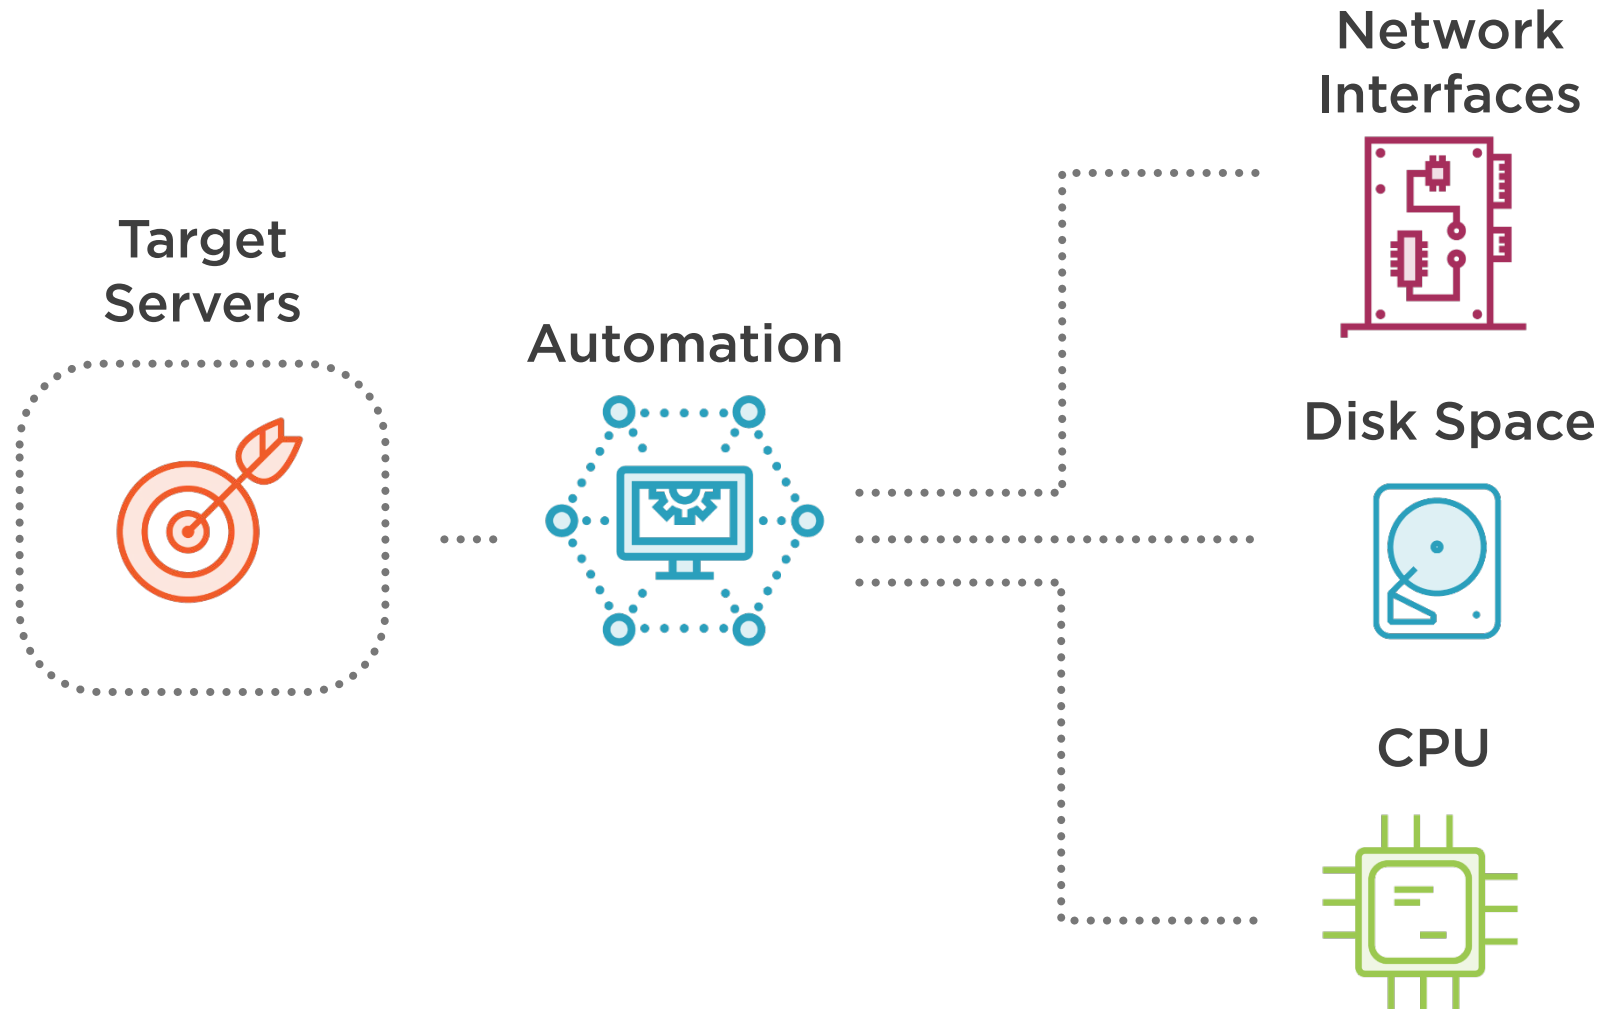

Quinn
Systems Administrator

Progress

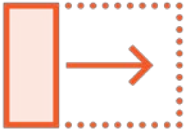

- Gather system information from servers
- Scheduled updates and restarts of servers
- Low diskspace remediation
- Software install requests

Gather System Information from Servers

Benefits of Automation

Reduced time to complete request

Less effort required when gathering additional information

Repeatable

Scheduled Updates and Restarts

Scheduled
automation

Run updates

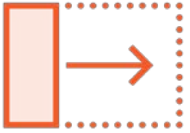

Reboot server
after updates

Verify server is
online

Benefits of Automation

Improved process

Consistency

Reliable

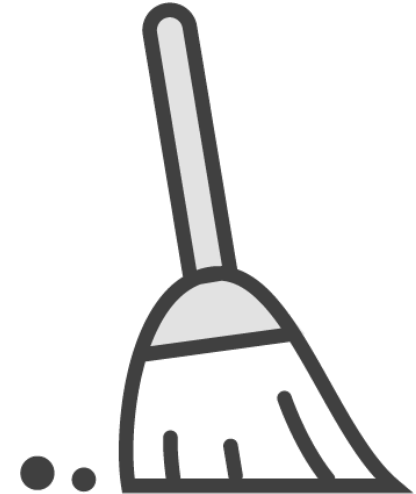

Remediate Low Diskspace

Search logs

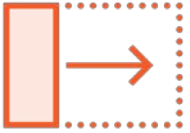

Low diskspace
detected

Run cleanup
automation

Benefits of Automation

Proactive vs. reactive

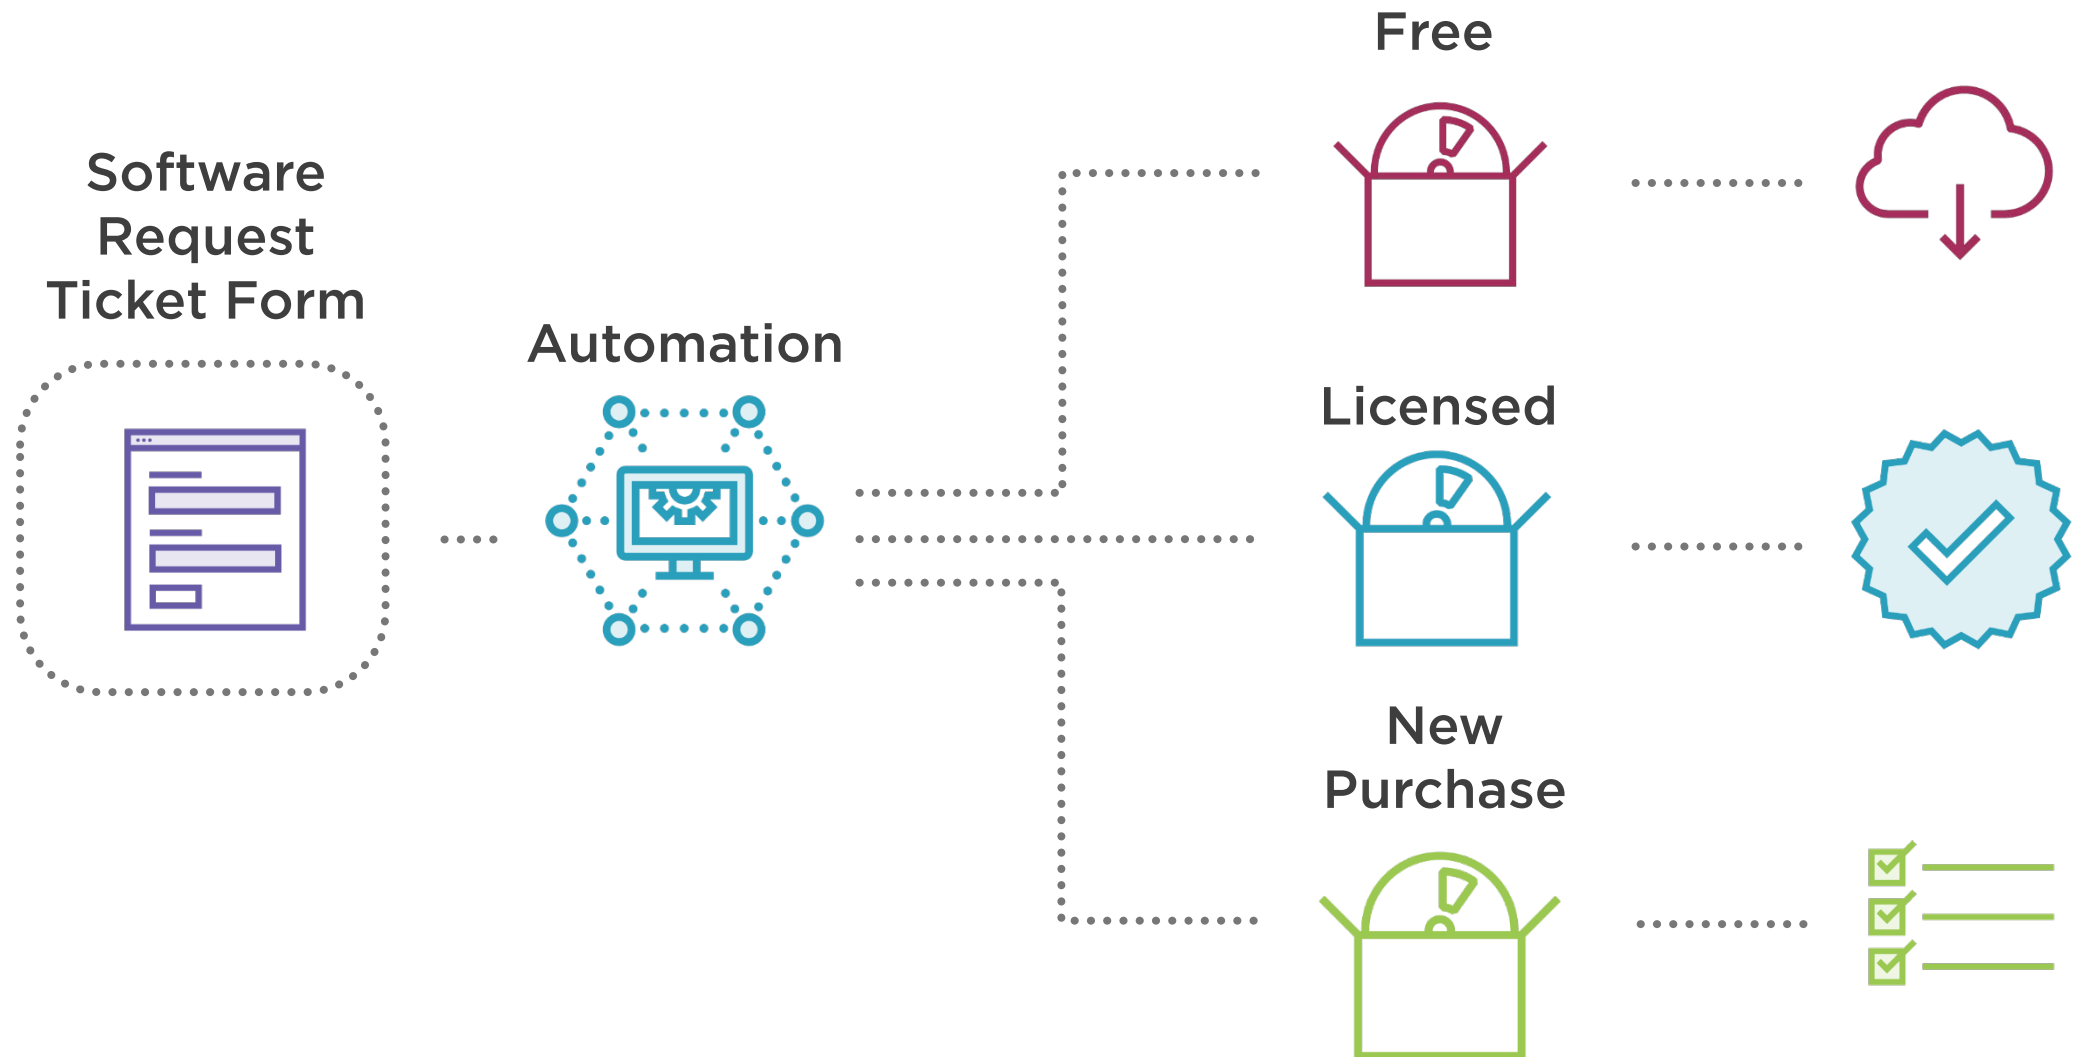

Improved confidence

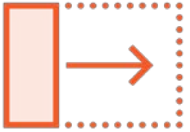

Less context switching

Software Requests

Benefits of Automation

Faster completion of requests

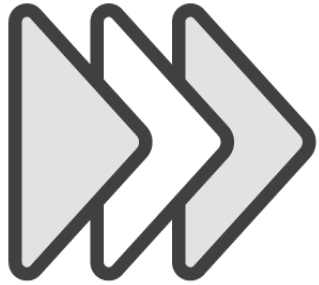

Happier end users

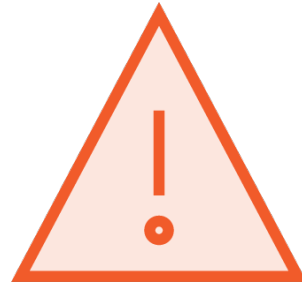

Reduced effort and time saved

Individual Benefits of Automation

Increased speed

Reduce errors

Repeatable

Shareable

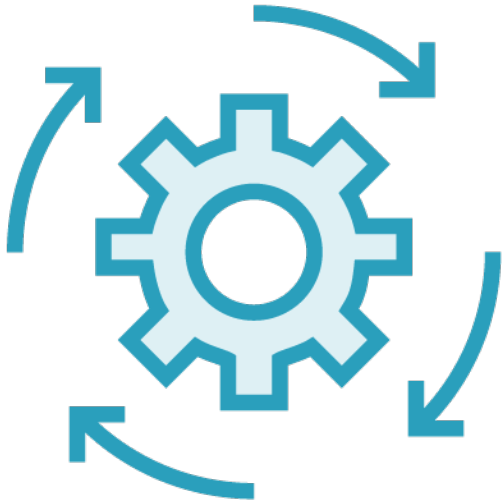

Documented

Fun

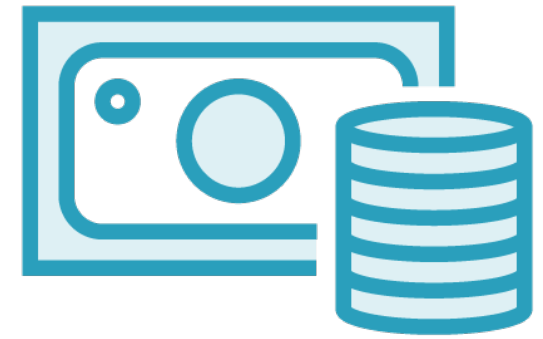

Organizational Benefits of Automation

Operational Efficiency

Quality

Reduced Cost

Summary

Examples of Automation

Individual Benefits of Automation

- Increased Speed
- Reduced Effort and Errors
- Repeatable and Reliable
- Shareable
- Documented
- Fun

Organizational Benefits of Automation

- Increased Operational Efficiency
- Improved Quality
- Reduced Cost
