Module 3 – Roles Exercise

Identifying people for the Business Roles – Millers Marmalade

Using the role briefs provided list the best person to fulfil each of the DSDM roles

- Make a note of your reasons and any risks with your selections.
- whether or not you would combine any roles and why
- whether you would assign more than one person to a particular role and why.

Exercise objectives:

To help Agile Project Managers understand the benefits of having the most suitable person in the business roles, be able to recognise the risks of having less suitable people and find the best fit for the roles from the people available. Getting the right people in the business roles is one of the most important factors contributing to the success of an Agile project.

PEOPLE PROFILES FOR THE PROJECT TEAM

Mrs. Miller Strong accountancy skills. She authorised the 'Top 100' project. Responsible for the running of the farm. Very decisive. Doesn't like the impersonal nature of the internet.

Mr. Miller Likes to play around with ideas. Starts many things but rarely finishes anything. Decides where the family business should be going at a strategic level. Very keen on technology and technology gadgets.

Jake Miller 'Hands-on' day to day running of the marmalade business. Leads a small team. Is very operationally focused on getting the right thing to the right customer. Takes most of the telephone calls that do not go directly to the account managers. Very reactive – responds to problems when they have happened.

Kerry Miller Handles Customer Service and Marketing. Tries to keep everyone happy. Responsible for dealing with any queries including those about the machinery in the marmalade process. Responsible for the 'image' and reputation of Millers Marmalade. Cares passionately about environmental issues.

Module 3 – Roles Exercise

Victor Popov The I.T.Manager who started as a website designer at Millers three years ago. Knows all of the existing systems and applications in detail, works long hours and leaves his phone on all the time in case of problems. Likes to straighten the pictures that hang in the reception area so that they look neat and tidy.

Sanjay Patel Responsible for looking after the team of account managers. His team are involved in selling, and organising the companies who deliver the marmalade (order fulfilment). Very good inter-personal skills. Really loves marmalade.

Mimi Bertillon Works very hard in order fulfilment. Is involved in the essential part of the process where the orders are packed and addressed according to the instructions provided by Sanjay and Jake and their colleagues. Is allergic to oranges and marmalade.

Sam O'Farrell General 'all rounder'. Has worked for the Millers for many years and is seen as the 'old timer'. Has experience of all areas of the marmalade business (and the farm as well). Is currently looking after the production line from cleaning the jars to filling them. Affectionately known as 'Grumpy'

Mary Hannington – a manager with TestyToo (responsible for this account) TestyToo are an agile testing company and have been appointed to work with the company to perform testing. They are very familiar with Agile. Although Mary is reasonably local, many of the testers are based offshore – with an 8 hour time difference.

Suzanne Perot An independent experienced Agile Project Manager appointed by Millers to lead them through the Web Design Project. Experienced in leading an Organisation through the transition from using a more traditional project management approach to implementing Agile Project Management.

Peter Brown An experienced web site developer from Creative Web Solutions the company that Millers have commissioned to develop the new web site

Clara Jensen A junior web site developer with Creative Web Solutions who works in Peter Browns team

Module 3 – Roles Exercise

Identifying people for the Business Roles Millers Marmalade - Suggested Answer

PEOPLE PROFILES FOR THE PROJECT TEAM

Mrs. Miller (Business Sponsor)

Mrs Miller owns the Business Case and ensures the funding is made available.

Mr. Miller (Business Visionary)

Mr Miller is the best person to define the Business Vision.

Jake Miller (Business Ambassador, Business Analyst)

Jake comes from the business area being addressed and would be the best person to ensure that the business perspective is taken into account for all decisions made. Jake would also be appropriate to take on the role of Business Analyst as he would be able to make sure that the needs of the business are properly analysed and correctly reflected in the guidance the team needs to generate an appropriate solution.

Kerry Miller (Business Advisor, Workshop Facilitator)

Kerry is likely to be called upon to provide Ad hoc assistance and guidance throughout the project.

If Kerry is not directly involved in the project then she could perform the role of Workshop Facilitator which fulfils the requirement for this role to be external to project delivery.

Victor Popov (Technical Co-ordinator/Technical Advisor)

Victor knows all of the existing systems and applications in detail and will be the best person to control the technical configuration of the solution and for managing the technical aspects of transition into live operational use.

Module 3 – Roles Exercise

Sanjay Patel (Business Advisor, Workshop Facilitator)

Sanjay is likely to be called upon to provide Ad hoc assistance and guidance throughout the project.

If Sanjay is not directly involved in the project then he could perform the role of Workshop Facilitator which fulfils the requirement for this role to be external to project delivery.

Mimi Bertillon (Business Advisor)

Mimi is likely to be called upon to provide Ad hoc assistance and guidance throughout the project.

Sam O'Farrell (Business Advisor)

Sam is likely to be called upon to provide Ad hoc assistance and guidance throughout the project.

Mary Hannington – a manager with TestyToo (responsible for this account) (Solution Tester).

Mary represents those that will perform a testing function.

Suzanne Perot (Project Manager, DSDM Coach)

Would be in a position take on the project manager role through this first Agile project and act as DSDM coach due to their previous experience.

Peter Brown (Team Leader, Solution Developer)

This leadership role is very likely to be taken by Peter and he would be the best person to lead the team through the development of the solution.

Clara Jensen (Solution Developer)

Clara will be interpreting the business requirements and translating them into a deployable solution.
