Module 9 – Planning Task

Produce a Delivery Plan

Please read all of the guidance below before you start.

Your task as PM is to produce the delivery plan for this increment. You will need to suggest the contents of each of the Timeboxes ensuring that the 60:20:20 guidance for Must, Should and Could requirements is taken into account. It is recognised that this will hardly ever be exact. This would normally be done in a workshop with the Project Manager and the Solution Development Team.

The total amount of effort that can be expended in a two week time box has been calculated as approximately 15 days effort. The following have been taken into account:

- Holidays and sickness
- Effort allocated to kick off, reviews and close out
- The track history of the solution development
- The make-up of the solution development team

Four two-week Timeboxes have been agreed to complete the following requirements.

Remember you are not producing a traditional GANTT chart, the delivery plan should just show the number of Timeboxes in this first increment and the suggested content of each Timebox. You do not need to decide the order that the requirements will be worked on for each Timebox, that is up to the Solution Development Team to decide at the Kick off of each Timebox. Once the first Timebox gets underway the composition of the subsequent Timeboxes will change in the light of what has transpired in the previous time box.

Tips: Either print the prioritised list, cut them up and then rearrange them on a desk or copy them onto sticky notes and then rearrange them until you are happy with the result. A suggested solution is given in a separate pdf. *Please note that this is a suggestion and you may come up with a better approach. It is not the end result but the actual planning process that is important.*

Module 9 – Planning Task

Suggested priorities for this exercise

No.	Requirement	MoSCoW	Estimated Effort Total 62 Days
1	As a customer I want to order marmalade so that I can specify what I want to receive	M	2
2	As a customer I want to change an existing open order (i.e. size, amount) so that I can ensure my order is what I actually want	M	3
3	As a customer I want to remove some marmalade from an existing order so that I can ensure my order is what I actually want	M	4
4	As a customer I want to choose to have the order gift wrapped so that I can send it as a present already wrapped to someone else	C	2
5	As a customer I want to browse product information (e.g. ingredients) so I can make sure the ingredients are healthy / will not cause an allergic reaction	M	5
6	As a customer I want to see a price list/catalogue of marmalades so I know what my order would cost	M	2
7	As an I.T. manager I want to ensure that the transaction over the web is secure so that customers have confidence in using our website	M	3

Module 9 – Planning Task

No.	Requirement	MoSCoW	Estimated Effort Total 62 Days
8	As a customer I want to search and filter by size, price and type of marmalade so I can quickly search for the exact item(s) I want to order	M	4
9	As a Customer Services Manager I want to allow a visitor to sign up to receive a newsletter so that we can provide more information in order to encourage further sales	C	2
10	As a Customer Services Manager I want to have a customer feedback facility so that we can act on negative comments quickly	C	1
11	As a Head of Operations I want to promote special offers so that we can easily draw these to our customers attention	C	2
12	As a customer I want to be able to enter a separate invoice address so that I can send marmalade to addresses other than my own	S	4
13	As a customer I want to be able to enter alternative delivery addresses so that I can get my orders delivered to friends and family, and to my workplace	C	1
14	As an Owner of Millers I want to provide information about Millers ('about us') so that we can promote the Millers family image	M	1

Module 9 – Planning Task

No.	Requirement	MoSCoW	Estimated Effort Total 62 Days
15	As an Owner of Millers I want to allow payment by credit card/debit card so that we avoid cheque handling, which will cost us more money per transaction	M	4
16	As a Head of Operations I want to automatically authorise credit card payment so that the order payment process needs the least possible number of Staff	M	3
17	As a customer I want to have other payment methods (e.g. cheque) so that I can buy marmalade even if I do not have a credit / debit card	S	2
18	As a Fulfillment Manager I want to notify the customer that the order has been dispatched so that the customer knows their order is on its way	S	2
19	As a customer I want to create, view and amend my customer details so that my details are always correct	M	5
20	As a customer I want to delete my customer details so that I will no longer receive marketing information from Millers	S	2
21	As a Head of Account Management I want to provide a trade area sign on facility so that my large order customers can process their orders as quickly as possible	C	2

Module 9 – Planning Task

Delivery Plan Exercise - Suggested Answer

Please note the following is just a suggestion, you may have come up with a different plan but it should still include the appropriate mix of approximately 60% of the Must, 20% of the Should and 20% of the Could Have requirements.

It will not always work out exactly, but after the first Timebox each subsequent Timebox will have to be re-planned. The main aim is to prove that overall you have the capacity to deliver and that you are not overloading the team with unrealistic requirements.

Each Timebox is of 2 Weeks Duration, effort is calculated to be approximately 15 days.

Timebox 1	Timebox 2	Timebox 3	Timebox 4
Requirements: 1, 11, 15, 16, 17	Requirements: 5, 6, 7, 9, 10, 18, 20	Requirements: 4, 8, 12, 19, 21	Requirements: 2, 3, 13, 14, 22, 23
Must 9 days 70% Should 2 days 15% Could 2 days 15%	Must 10 days 59% Should 4 days 23% Could 3 days 18%	Must 9 days 54% Should 4 days 23% Could 4 days 23%	Must 8 days 53% Should 3 days 20% Could 4 27%
